

Campus Facilities Management
Planning & Construction

January 3, 2011

Sirs,

Tinmaster Inc. has provided service on several of our building projects the most recent being the Health Science Building totaling 40,000,000 million dollars. Tinmaster Inc. exemplified what every owner wants from every contractor a professional attitude willing to accomplish goals and solve problems in a quick and orderly manor willing to go that extra step further to complete a project that will allow all involved parties to claim a job well done. The field personnel and the management of Tinmaster Inc. worked on our projects as a team of professionals and provided us the best product and end results that exceed most contractors in their field of work. I can personally say that my involvement with Tinmaster under the guidance of Rob Eslinger has been an experience of satisfaction.

Sincerely,

Carl B Dotson
